Graphity Demonstration Space Home

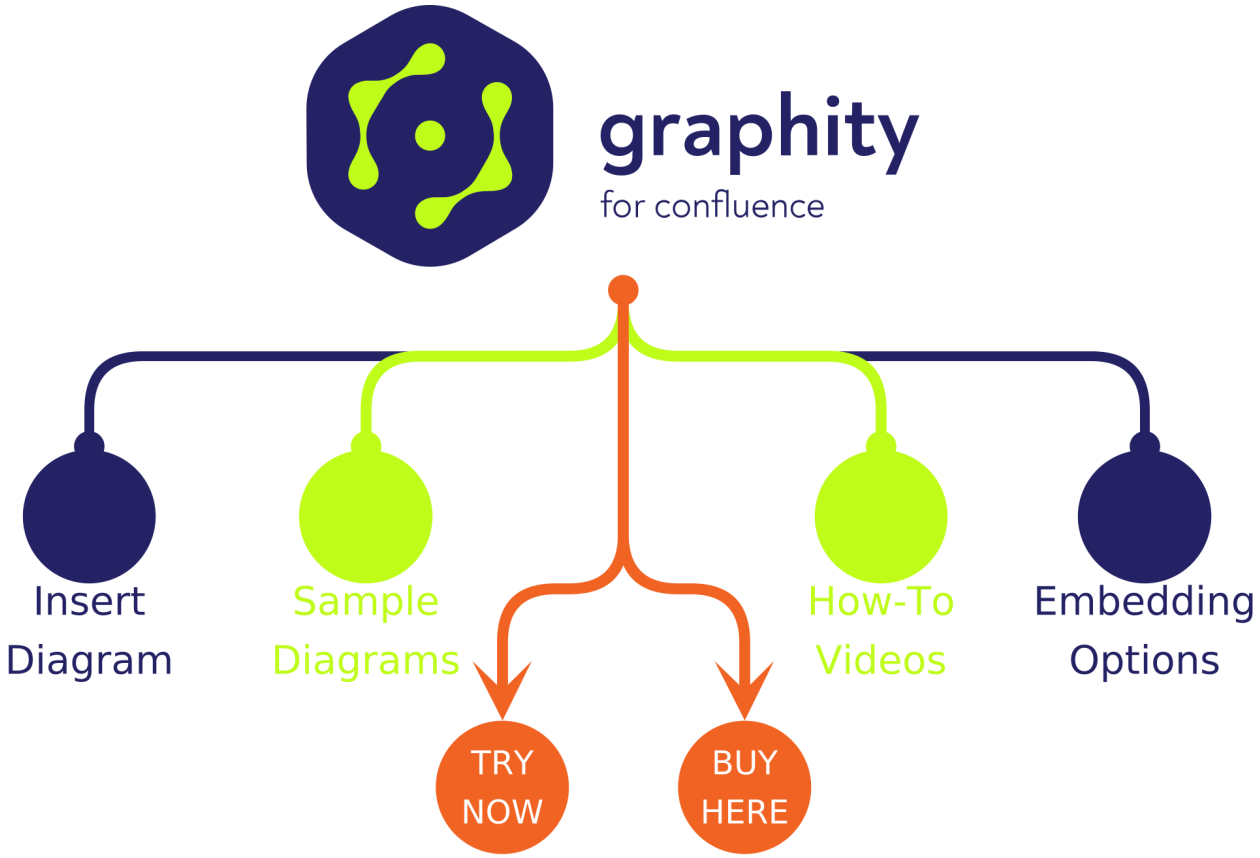

Getting Started

- Use the diagram below to navigate through the site's content.
- Click TRY NOW to create your first diagram in Graphity - without any login or registration.
- Click the other nodes in the diagram to get more information like how-to videos, or how to insert a diagram.
- Discover the possibilities of Graphity on the Sample Diagrams page.

Graphity® for Confluence is a powerful diagramming plugin for Atlassian Confluence®.

It enables you to quickly generate, embed, edit, and store high-quality renderings of flowcharts, network graphs, UML class diagrams, and other diagrams directly inside Confluence – without external tools or storage needed.

Visit Graphity in the Atlassian Marketplace

About this Site

This Confluence installation is intended for you to learn about and experiment with Graphity for Confluence - in a real Confluence environment, without any registration or login. It's completely free!

Please use the diagram on this page, or the sidebar for navigation through the site's content. You can modify the Sandbox page and create new pages to test the Graphity app.

Please note that any entered data and diagrams will be wiped once a day.
